The day will consist of a series of in-car driving exercises preceded by classroom instruction focusing on the specific aspects of the curriculum, vehicle dynamics, and the importance of vehicle maintenance.

Students will learn how to avoid accidents in a controlled environment at typical driving speeds. Students will drive their own cars and instructors will be supervising and providing in-car tuition. A parent or guardian must be present and sign a minor participation waiver. Parents can also take a "refresher course" and participate in the curriculum.
